

# SKIPPER SMALL KEELBOAT ANSI Practical Competency Assessment Rubrics

#### **Instructions for the Assessing Instructor**

Assess your student using the following Practical Competency Assessment Rubrics on a keelboat on the water. You may pass the student for Skipper after you deem that, considering the skills required and their ability to perform them, you believe they could competently and safely skipper a sailboat (of similar size on which they are being assessed) with their friends and family. It is your discretion as to the pass or not given the evidence you have created from the rubrics.

As a general guide: If the student demonstrates below the expectation of critical skills that create a safety concern, then you should not pass them as Skipper. However, some demonstrations of below expectation for non-critical skills with demonstration of mild competence might lead you however to allow a pass as Skipper. More than several repeated demonstrations of below expectation performance should lead you to consider a pass as Qualified Crew practical competence only. A fail grade after several demonstrations in any skill should lead to either a fail or Qualified Crew only.

#### If the student gains a pass:

- Check the appropriate "Pass" boxes below and make as to further training or place restrictions considering their skills e.g. winds less then 12 knots
- ASK YOUR STUDENT FOR THEIR SECRET LOGBOOK CODE (not their password) AND THEIR SIGNIN EMAIL ADDRESS. Their logbook code is self assigned and is in their "myprofile" section. They must have this filled in before you can gain access.
- Login to NauticEd.org with your instructor signin ID and password.
- In the search box, enter the student's email address and logbook code. Then check the Upgrade This Student's Practical Competency box
- In the dropdown, check the appropriate Skipper or Qualified Crew Verified Practical Competency box. Make additional notes about the student's competency in the appropriate fields. If using the Rubrics Assessment App, upload their Rubric results into their logbook
- Their Sailing Certificate and Sailing Resume will then be instantly updated with your name as the Verified Practical Competency Instructor along with your School.
- Your student will then be given the opportunity to rate their experience with you. Results of this are sent to you, the school principle and NauticEd Admin and posted online alongside your NauticEd Instructor profile.

#### Note:

Under NauticEd definition, Skipper competence is reserved for sailboats from 25 ft (7.6 m) to 60 ft (18 m) in length, whereas Skipper Small Keelboat competence is reserved for sailboats 25 ft (7.6 m) in length or less. Qualified Crew member spans across all sailboat sizes to 60 ft (18m).

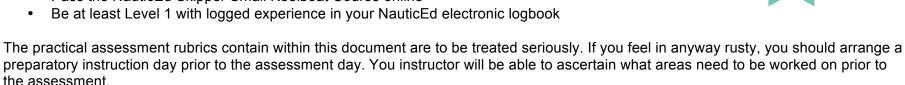

# SKIPPER SMALL KEELBOAT ANSI Practical Competency Assessment Rubrics

#### Instructions for the Student

You will need to give to your Assessor your NauticEd sign-in email address and your secret logbook code (not your password). You logbook code is listed under your profile. You make it up and enter it. Your Assessor will need this to sign you off, should you pass.

Pass the NauticEd Skipper Small Keelboat Course online

On assessment day, show up prepared in appropriate clothing for the weather, food, and drink. Be prepared to be tested on the practical sailing skills contained.

After completing the Assessment, if YOU do not feel confident and competent to skipper a small keelboat on your own including taking responsibility for others on the vessel, you should report this to the Assessor who will devise a further training plan to ensure your safety before signing you off for Skipper competence

Once you are deemed competent by the Assessor according to the attached skills and have completed the above AND YOU feel confident and competent, the above Verified Skipper Competence ANSI (American National Standards Institute) badge for demonstrated sailing knowledge and skills will be printed on your NauticEd certificate.

Good luck on your assessment.

Sincerely,

Grant Headifen
Global Director of Education

NA Fail Crew Skip Excl		NA Fail Crew Skip Excl		NA Fail Crew Skip Excl		NA Fail Crew Skip Excl		NA Fail Crew Skip Excl				

To precisely complete the requirements for the American National Standards for a keelboat under 26 feet, the student must be assessed for competency under tow. This requirement has been moved to this section so as not to detract from the requirements of the previous sections 1-7. Until this section 8 is complete however, (along with sections 1-7), the student can not be signed off for American National Standards On-The-Water Skills SAIL.

Student 1		Student 2		Student 3		Student 4		Student 5		
Skill Set 8. Under Tow										
8.1 Accept a tow line and m	naneuveri	ng behind under tow								
BY: making an appropriate le	ength tow	line and tossing or accepting	, attachin	g to the vessel appropriately	, and read	lying the boat for safe towing	g including	g securing sails, boom, and		
sheets. Demontrates awarer	sheets. Demontrates awareness of centerboard if applicable and rudder. Maneuvering the boat safely under tow for 20 boat lengths staying inline behind the tow boat's stern.
